

## GETTING STARTED

# What you will need

The process is simple and takes only a few minutes to complete.

- A valid email address
- Your personal identification document (passport or government ID)
- A few minutes of your time

### **Registration flow**

Step 1 - Personal Details

Step 2 - Further Information

Step 3 - Account Configuration

Step 4 - Declaration

Step 5 - Identity Verification

Step 6 - Account Ready - Fund & Start Trading

## STEP 01

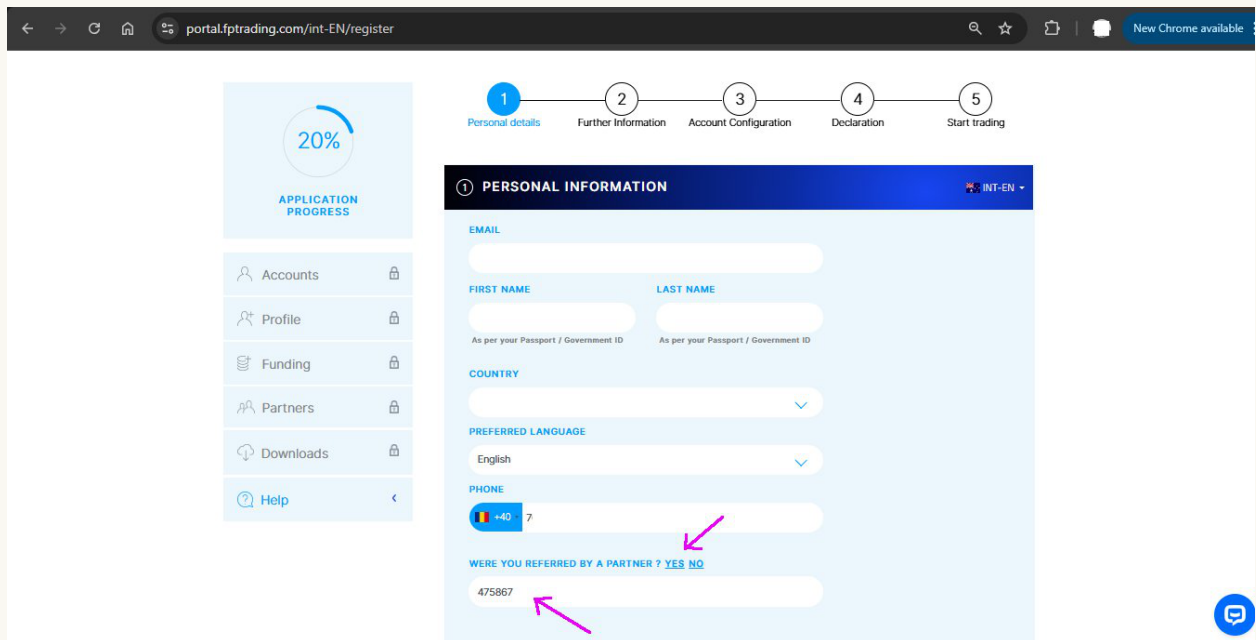

# Personal Details

Click the registration link provided to you. This will take you directly to the FP Trading registration page where you begin filling in your personal information.

Fill in your email address, first name, last name (as they appear on your passport or government ID), select your country, choose your preferred language, and enter your phone number.

### Important

At the bottom of the page, when asked 'Were you referred by a partner?', click YES. The referral code 475867 should already be pre-filled. This links you to our introducing broker for copy trading support.

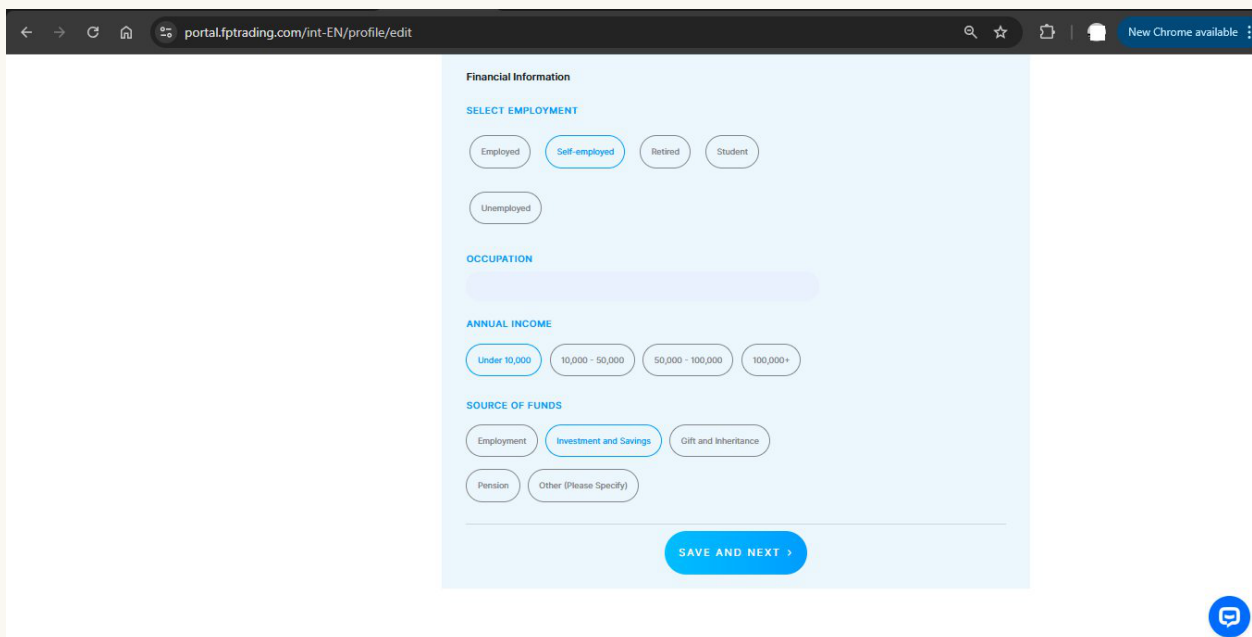

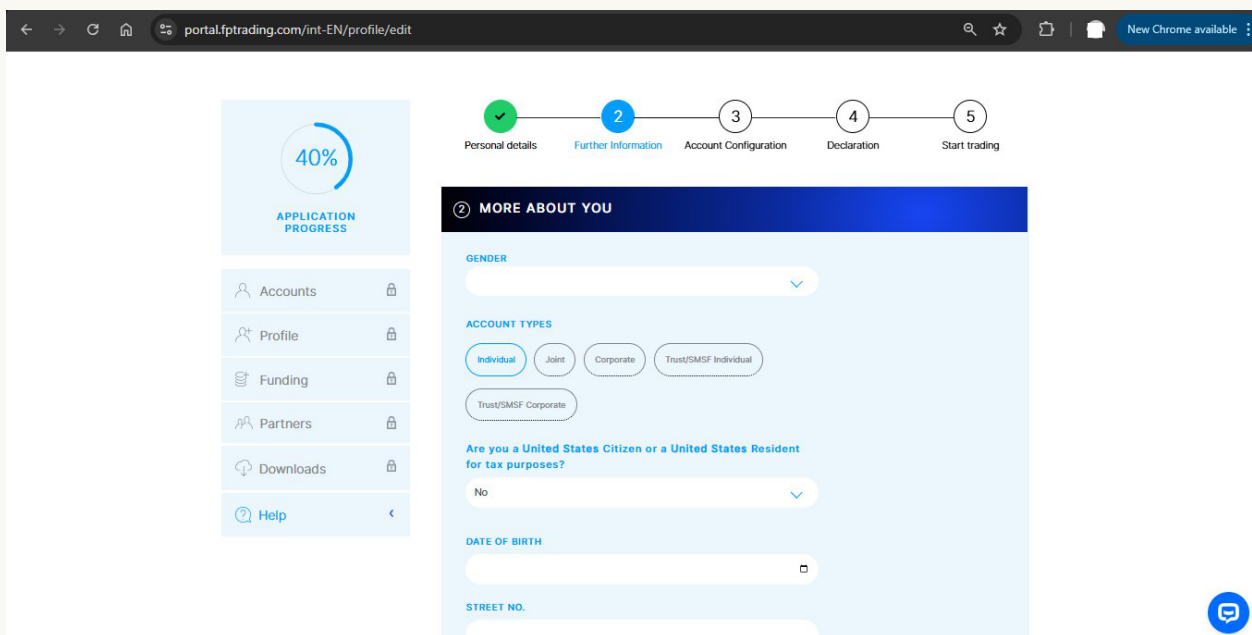

## STEP 02

### Further Information

After clicking Save and Next, you will be taken to the second step where the broker collects additional information about you.

Part A - More About You: Select your gender, choose Individual as your account type, answer the US citizen/resident question, enter your date of birth, and provide your street address.

Part B - Financial Information: Select your employment status, enter your occupation, choose your annual income range, and select your source of funds. Once everything is filled in, click Save and Next.

## STEP 03

# Account Configuration

This is a very important step where you configure your trading account. Please make sure to select the following settings:

Platform: MetaTrader 5

Account Type: Raw

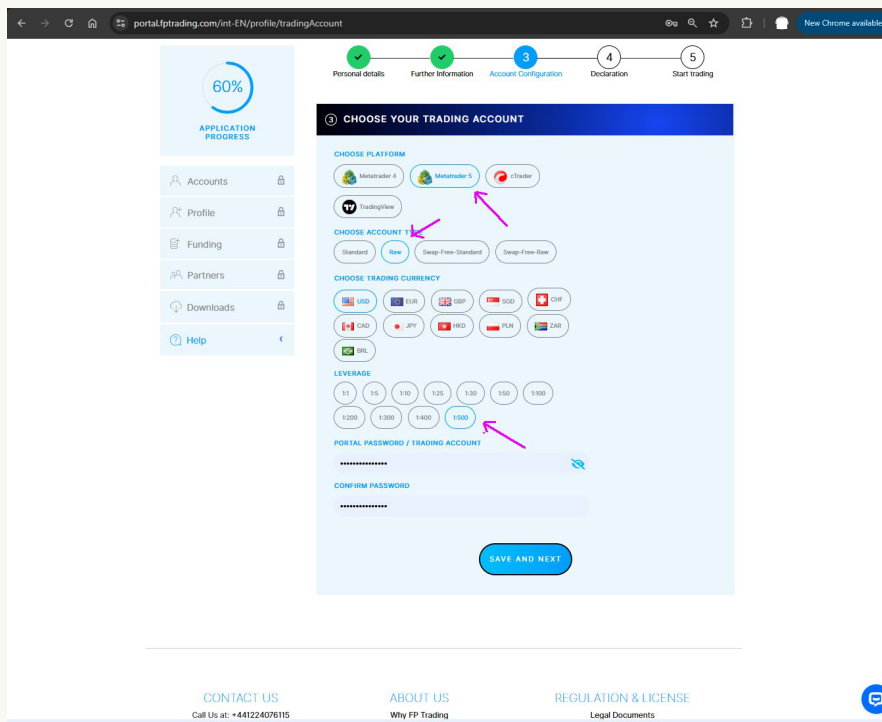

Trading Currency: Choose your preferred currency (EUR or USD)

Leverage: 1:500 (maximum available)

Password: Create a strong password for your trading account

### Important

Make sure to select MetaTrader 5 as the platform and Raw as the account type. These are the required settings for copy trading. Set the leverage to 1:500.

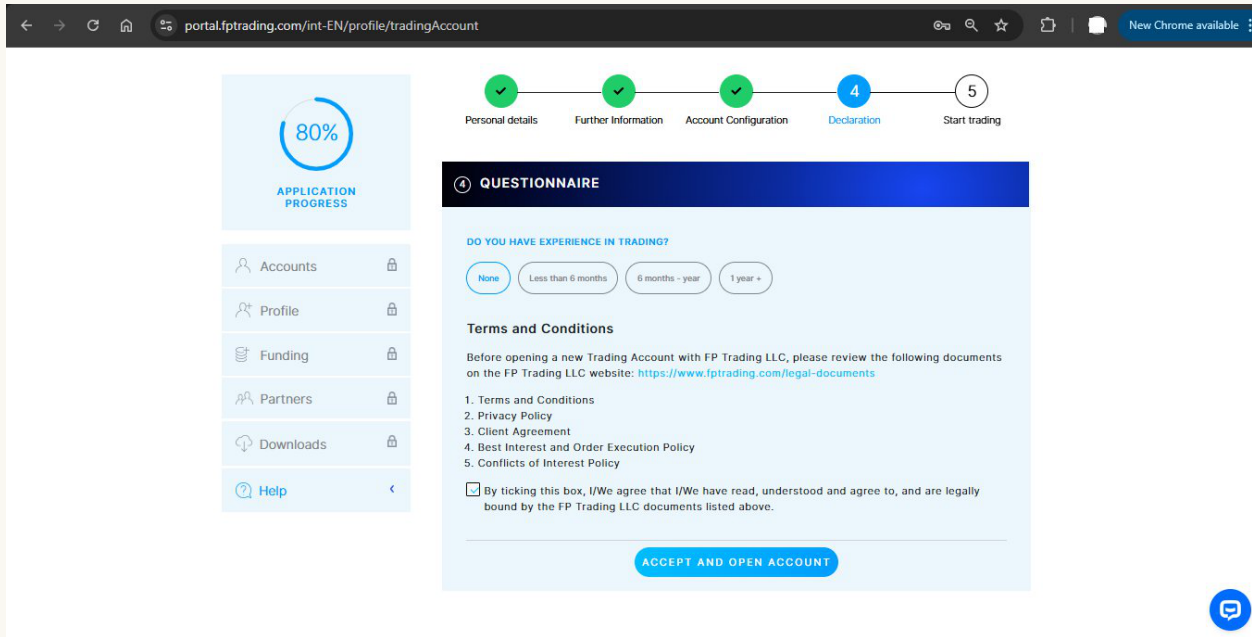

## STEP 04

# Declaration

In this step, you will be asked about your trading experience. Select the option that best describes your experience level. Then, review the Terms and Conditions listed on the page.

Tick the checkbox to confirm that you have read, understood, and agree to the terms. Finally, click Accept and Open Account to proceed.

STEP 05

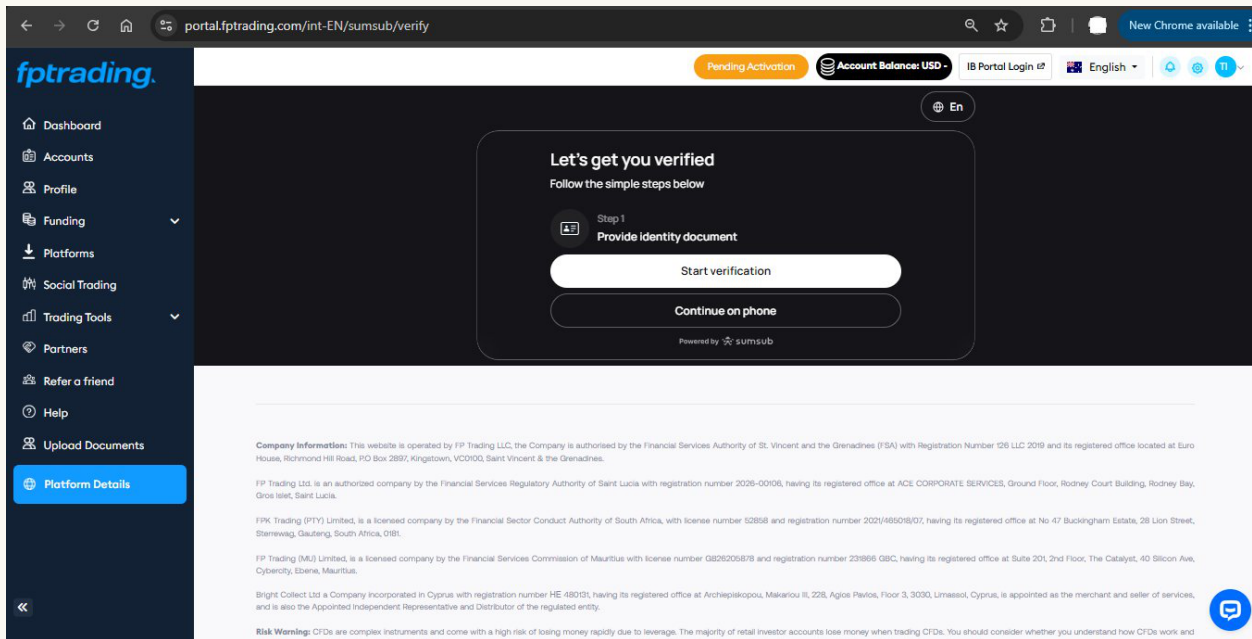

# Identity Verification

After completing the registration form, you will be redirected to your personal portal. Here, the broker will ask you to verify your identity. This is a standard procedure required by financial regulations (KYC - Know Your Customer).

FP Trading uses Sumsub, a trusted identity verification provider. You will need to provide a valid identity document (passport or government-issued ID). You can complete this step directly in your browser or transfer the process to your mobile phone for easier document scanning.

## Important

FP Trading is a regulated financial institution. Identity verification is a legal requirement and helps protect your account and funds.

**STEP 06**

## Account Ready - Fund & Start Trading

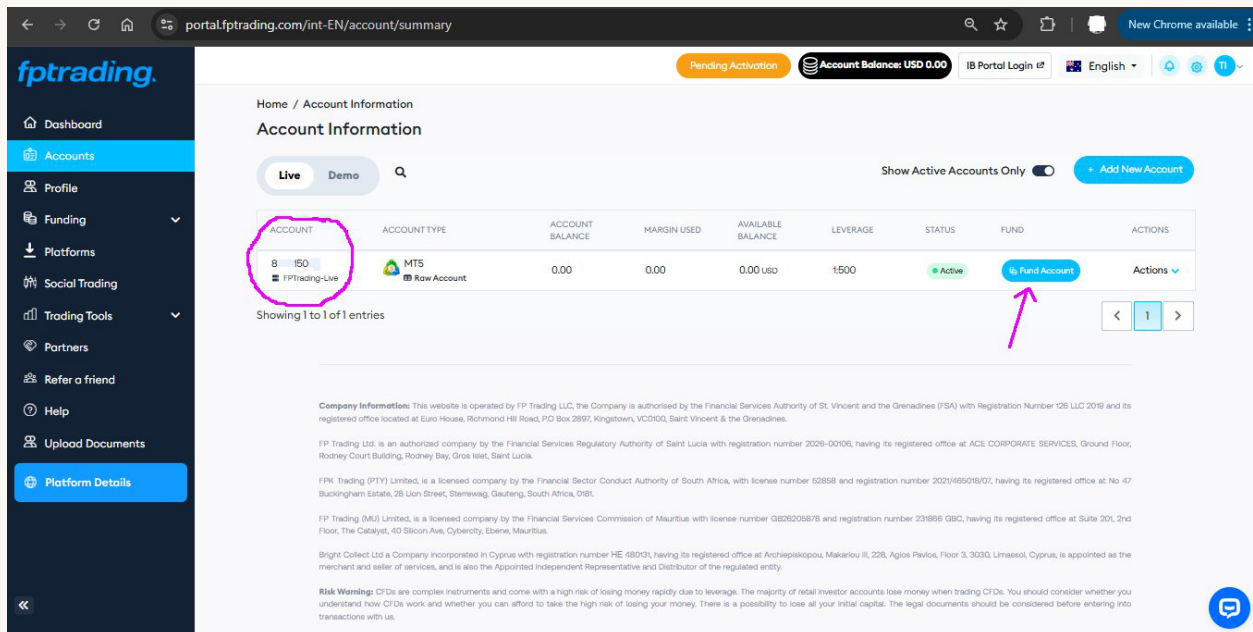

Once your identity has been verified, your account will be activated. Navigate to the Accounts tab in the left menu of your portal to see your new live trading account.

You will see your account number, along with the account type (MT5 Raw), leverage (1:500), and status (Active). To start copy trading, click the Fund Account button to deposit your desired amount.

You are all set. After funding your account, you will receive further instructions on how to connect to the copy trading service. If you have any questions along the way, do not hesitate to reach out for support.

### Important

Keep your account number safe - you will need it to connect to the copy trading service.

### Telegram support

If you need help during setup or connection, you receive support inside our Telegram group:
